

Embleton Care Flies Through Accreditation Visit

October 30, 2007

Embleton Care was recently visited by the Aged Care Standards and Accreditation as part of our ongoing accreditation requirements.

The agency was developed to ensure the highest standards in aged care and conducts regular audits on facilities. Many of these audits are unannounced to ensure that the standards are met at all times.

The facility underwent such an audit in the beginning of October 2007.

The auditors found that Embleton Care met all of the standards assessed. Auditors commended the facility on the hard work conducted to ensure that our systems ensure best practice in residential care.
